

NAME

ipcs – provide information on ipc facilities

SYNOPSIS

ipcs [**-asmq**] [**-tclup**]

ipcs [**-smq**] **-i** *id*

ipcs **-h**

DESCRIPTION

ipcs provides information on the ipc facilities for which the calling process has read access.

The **-i** option allows a specific resource *id* to be specified. Only information on this *id* will be printed.

Resources may be specified as follows:

-m shared memory segments

-q message queues

-s semaphore arrays

-a all (this is the default)

The output format may be specified as follows:

-t time

-p pid

-c creator

-l limits

-u summary
